### Features & Benefits

- This model bin is completely hydraulically operated.
- The top fold augers are hydraulically raised and lowered.
- The motor is an ULP 32.2 or 35HP key start Kohler motor, manufactured in the USA.
- The augers are 8 inch diameter stainless steel, with an output of around 1 tonne per minute.
- Bins have standard 2.7m long top fold augers which can be upgraded to 3.0m long or shortened to 2.4m long if required.
- Auger length can be upgraded to 3.0m for an extra \$480.00 + GST per auger.
- The 2.4m augers have a credit of \$480.00 + GST per auger.
- A hand held remote controller is supplied to operate the augers. it has a range of 20m from the truck.
- The floor augers cannot be operated unless the discharge augers are operating to save possible damage.
- Truck securing chains and turn buckles are supplied.
- The bin is painted in 2 pac paint, has a roll tarp, sight glasses, four lights, marine grade fuel tank and lines and back-up manual hydraulics.
- Bins have standard 2.7m long top fold augers which can be upgraded to 3.0m long or shortened to 2.4m long if required.

### How to Calculate outlet height

- 2.4m long auger = 2.1m above truck tray
- 2.7m long auger = 2.3m above truck tray
- 3.0m long auger = 2.5m above truck tray
